LIST OF CONTENTS

NUMBER 1

A. R. Kukreti and **R. Prasad**	1	Hysteretic behavior prediction of full and partial penetration transverse groove welded joints
M. J. Terro and **S. A. Hamoush**	13	Inelastic analysis of sections subjected to axial force and bending moment
B. Bhushan, G. Singh and **G. Venkateswara Rao**	21	Asymmetric buckling of layered orthotropic circular and annular plates of varying thickness using a computationally economic semianalytical finite element approach
M. G. Coutie and **M. Saidani**	35	The adjustment of stiffness matrices
A. Schokker, S. Sridharan and **A. Kasagi**	43	Dynamic buckling of composite shells
H. T. Rathod and **H. S. Govinda Rao**	55	Integration of polynomials over an arbitrary tetrahedron in Euclidean three-dimensional space
P. A. Bosela and **D. R. Ludwiczak**	67	Geometric stiffness effects on data recovery of an idealized mast/blanket model
Yohchia Chen	81	Modeling and analysis methods of bridges and their effects on seismic responses: I—theory
Yohchia Chen	99	Modeling and analysis methods of bridges and their effects on seismic responses: II—implementation
D. K. Maiti and **P. K. Sinha**	115	Bending, free vibration and impact response of thick laminated composite plates
A. Kaveh and **A. Davaran**	131	Analysis of pantograph foldable structures
C. I. Tseng and **W. J. Liou**	141	Simulation of a bimorph transducer under acoustic excitation
I. Sheinman	149	Damage detection and updating of stiffness and mass matrices using mode data
P. K. Aditya and **P. K. Sinha**	157	Moisture diffusion in variously shaped fibre reinforced composites
J. S. Peng, R. W. Lewis and **J. Y. Zhang**	167	A semi-analytical approach for solving forced vibration problems based on a convolution-type variational principle
Chang-Koon Choi and **Sung-Hoon Cheung**	179	Tension stiffening model for planar reinforced concrete members

Technical Note

M. N. S. Hadi and **A. S. Watson** 191 The manipulation of engineering design calculations by a calculation processing system: II—implementation

NUMBER 2

N. S. Bardell 195 An engineering application of the *h–p* version of the finite element method to the static analysis of a Euler–Bernoulli beam

K. Nagamani and **C. Ganapathy** 213 Finite element analysis of nonlinear dynamic response of articulated towers

G. Ravichandran, V. P. Raghupathy and **N. Ganesan** 225 Analysis of temperature distribution during circumferential welding of cylindrical and spherical components using the finite element method

H. B. Zhou and **G. Y. Li** 257 Free vibration analysis of sandwich plates with laminated faces using spline finite point method

N. I. Ioakimidis and **E. G. Anastasselou** 265 Annihilation of loading parameters in classical numerical methods with differential equations

P. Smolinski 273 Subcycling integration with non-integer time steps for structural dynamics problems

C. J. Shih and **R. A. S. Wangsawidjaja** 283 Mixed fuzzy-probabilistic programming approach for multiobjective engineering optimization with random variables

M. Abdel-Rohman and **J. Al-Duaij** 291 Dynamic response of hinged–hinged single span bridges with uneven deck

T. S. Lau and **S. H. Lo** 301 Finite element mesh generation over analytical curved surfaces

B. C. Huang, A. Y. T. Leung, K. M. Lam and **Y. K. Cheung** 311 Analytical determination of equivalent modal damping ratios of a composite tower in wind-induced vibrations

O. A. Bauchau and **N. J. Theron** 317 Energy decaying scheme for nonlinear elastic multibody systems

M. R. Al-Abed, C. D. Bisbos and **P. D. Panagiotopoulos** 333 Behavior of circular cylindrical shells due to local debonding

H. Ramon and **J. De Baerdemaeker** 347 A modelling procedure for linearized motions of tree structured multibodies—1: derivation of the equations of motion

H. Ramon and **J. De Baerdemaeker** 361 A modelling procedure for linearized motions of tree structured multibodies—2: design of an active spray boom suspension on a spraying-machine

G. Venkateswara Rao, G. Sinha, N. Mukherjee and **M. Mukhopadhyay** 377 A finite element free vibration analysis of a thermally stressed spinning plate

Compendium

D. N. Trikha, N. M. Bhandari and **N. K. Saxena** 387 Modified profile solver for finite–infinite coupled problems

NUMBER 3

C.-H. Lu, R. Mao and **D. C. Winfield** 397 Free vibration of thick-walled laminated conical tubes

P. Dadras and **S. Shivashankar** 407 Bonding residual stresses in high-temperature composites

Hua Zhao, Zhen-Bang Kuang and **Zhong-Hua Li** 419 Stress-intensity factor for a semi-elliptical surface crack at the thread root of a screwed-pipe joint

Yimin Zhang, Suhuan Chen, Qiaoling Liu and **Tieqiang Liu** 425 Stochastic perturbation finite elements

Suhuan Chen, Peng Guan and **Bo Shen** 431 Sensitivity analysis of eigenproblems for symmetrically laminated composite plates

R. Betti and **A. Gjelsvik** 437 Elastic composite beams

I. S. Raju, R. Sistla and **T. Krishnamurthy** 453 An efficient boundary element method for computing accurate stresses in two-dimensional anisotropic problems

K. Ikeda, K. Murota and **I. Elishakoff** 463 Reliability of structures subject to normally distributed initial imperfections

M. H. Kadivar and **H. Sharifi** 471 Double mapping of isoparametric mesh generation

A. K. Datta and **S. N. Sil** 479 An analysis of free undamped vibration of beams of varying cross-section

G. Subramanian and **P. Mohan** 485 A fast algorithm for the static shape control of flexible structures

D. Bushnell and **W. D. Bushnell** 489 Approximate method for the optimum design of ring and stringer stiffened cylindrical panels and shells with local, inter-ring, and general buckling modal imperfections

R. C. Averill and **Yuen Cheong Yip** 529 Development of simple, robust finite elements based on refined theories for thick laminated beams

A. Doğangün, A. Durmuş and **Y. Ayvaz** 547 Static and dynamic analysis of rectangular tanks by using the Lagrangian fluid finite element

Jung-Hwan Lee 553 On the application of the modal integration method to flexible multibody systems

L. L. Leff and **D. Y. Y. Yun** 561 Symbolic math applications to constructive solid geometry and finite element analysis

H. Chanda and **K. K. Tamma** 583 Developments encompassing stress based finite element formulations for materially nonlinear static/dynamic problems

NUMBER 4

H. Lahtinen and **A. Pramila** 593 Accuracy of composite shell elements in transient analysis involving multiple impacts

Baoguo Wu, Xingwen Du and **Huifeng Tan** 601 A three-dimensional FE nonlinear analysis of membranes

A. Tesar 607 Shear lag in the behaviour of thinwalled box bridges

J. R. Banerjee, S. Guo and **W. P. Howson** 613 Exact dynamic stiffness matrix of a bending–torsion coupled beam including warping

L. Yin, X.-M. Wang and **Y.-P. Shen** 623 Damage-monitoring in composite laminates by piezoelectric films

Cheng-Jen Chen and **Wen-Jyi Wu** 631 Application of the Taylor differential transformation method to viscous damped vibration of hard and soft spring system

G. Alfano, F. Marotti de Sciarra and **L. Rosati** 641 Automatic analysis of multicell thin-walled sections

D. J. Allman 657 Implementation of a flat facet shell finite element for applications in structural dynamics

Y. F. Al-Obaid 665 Automated analysis of topside platform hatch covers subject to drill collar impact

I. Kaljević, S. N. Patnaik and **D. A. Hopkins** 691 Development of finite elements for two-dimensional structural analysis using the integrated force method

B. Q. Xu and **X. A. Kong** 707 A modified tree search algorithm for contact BEM-LCP approach

Zhen-Guo Yang and **B. Lauke** 715 An effective method for analyzing interference effect of arbitrary multiple defects

O. A. Olukoko, A. A. Becker and **R. T. Fenner** 729 Boundary element analysis of heat conduction and thermal stresses in contact problems using independent meshing

Wang Huaizhong 743 Incidence-radiation condition of an artificial boundary

J. M. Araújo and **A. M. Awruch** 751 An objective cracking criterion for the analysis of concrete dams

Yee-Pien Yang and **Chein-Cherng Tu** 757 Multiobjective optimization of hard disk suspension assemblies: part I—structure design and sensitivity analysis

Yee-Pien Yang and **Yi-An Chen** 771 Multiobjective optimization of hard disk suspension assemblies: part II—integrated structure and control design

Technical Note

S. L. Willis, W. F. Carroll and **Tyng-Lin Yang** 783 The Space Shuttle liftoff pressure wave

NUMBER 5

S. C. Lee, J. S. Davidson and **C. H. Yoo** 789 Shear buckling coefficients of plate girder web panels

M. Gürgöze and **A. Özer** 797 On the slightly damped uniform n-mass oscillator

H. J. Zhu, K. Nakagawa and **S. J. Duan** 805 A study on optimization of power transmission pylons by minimization of the square sum of the natural periods

A. A. Khdeir 813 A remark on the state-space concept applied to bending, buckling and free vibration of composite laminates

J. J. Chen, Y. G. Zeng and **H. A. Sun** 819 Dynamic reliability analysis of antenna reflector accuracy under wind excitation

Gengdong Cheng and **Hua Li** 823 New method for graded mesh generation of quadrilateral finite elements

C. Jayatheertha, J. P. H. Webber and **S. K. Morton** 831 Application of artificial neural networks for the optimum design of a laminated plate

M. I. Haque 847 Optimal frame design with discrete members using the complex method

H. Matsunaga 859 Buckling instabilities of thick elastic beams subjected to axial stresses

A. N. Bercin and **R. S. Langley** 869 Application of the dynamic stiffness technique to the in-plane vibrations of plate structures

Y. Calayir, A. A. Dumanoğlu and **A. Bayraktar** 877 Earthquake analysis of gravity dam–reservoir systems using the Eulerian and Lagrangian approaches

U. O. Akpan and **M. R. Kujath** 891 Stochastic response of a flexible mobile robotic manipulator structure

Chia-Ching Lin, E. C. Lawton, J. A. Caliendo and **L. R. Anderson** 899 An iterative finite element–boundary element algorithm

Li Shu and **Feng Tai-Hua** 911 An efficient method for elastic–plastic analysis of destructive structures

F. C. Mbakogu and **M. N. Pavlović** 915 Analysis of thin shells by the two-surface truss model—I: a general formulation

F. C. Mbakogu and **M. N. Pavlović** 935 Analysis of thin shells by the two-surface truss model—II: numerical performance

Chongbin Zhao and **G. P. Steven** 949 *A-posteriori* error estimator/corrector for natural frequencies of thin plate vibration problems

T. Aksu 965 A finite element formulation for column-supported hyperboloid cooling towers

Technical Note

Chang-New Chen 975 A finite element study on Shanley's plastic buckling theory of short columns

NUMBER 6

Sen Yung Lee, Ju Chun Lin and **Kuo Ching Hsu** 983 Elastic instability of a beam resting on an elastic foundation subjected to a partially tangential force

H. S. Oh and **J. K. Lim** 989 A simple error estimator for size and distortion of 2D isoparametric finite elements

J. A. C. Ambrósio 1001 Dynamics of structures undergoing gross motion and nonlinear deformations: a multibody approach

Y. L. Mo and **W. L. Hwang** 1013 The effect of prestress losses on the seismic response of prestressed concrete frames

P. Fedelinski, M. H. Aliabadi and **D. P. Rooke** 1021 The Laplace transform DBEM for mixed-mode dynamic crack analysis

I. Takahashi and **T. Yoshioka** 1033 Vibration and stability of a non-uniform double-beam subjected to follower forces

J. Mayo and **J. Domínguez** 1039 Geometrically non-linear formulation of flexible multibody systems in terms of beam elements: geometric stiffness

Ine-Wei Liu 1051 An element for static, vibration and buckling analysis of thick laminated plates

Wen-jun He, Hao-jiang Ding and **Hai-chang Hu**	1059	Non-equivalence of the conventional boundary integral formulation and its elimination for plane elasticity problems
M. A. Pisani	1063	A numerical method to analyse compact cross-sections
Xiaojian Liu and **Gaofeng Wu**	1073	Dominant mode method for the minimum time design of slewing flexible structures
A. Joseph Stanley and **N. Ganesan**	1083	Frequency response of shell–plate combinations
S. A. Alghamdi and **A. M. Shazali**	1095	HLXVIB—a computer code for free vibration analysis of circular helicoidal bars
I. Stefanov	1107	Application of patched elements based on a previous finite element solution in plane elasticity problems
P. R. Marur	1115	An engineering approach to impact analysis of notched beams by conventional beam elements
Kim Yong-woo and **Min Oak-key**	1121	Optimal strain locations of two-dimensional continuum elements in terms of field-consistency
Liping Wang and **R. V. Grandhi**	1139	Safety index calculation using intervening variables for structural reliability analysis
P. Katragadda and **I. R. Grosse**	1149	*A posteriori* error estimation and adaptive mesh refinement for combined thermal-stress finite element analysis
S. Subhash Babu and **S. K. Bhattacharyya**	1165	Finite element analysis of fluid-structure interaction effect on liquid retaining structures due to sloshing
P. A. Fotiu and **S. Nemat-Nasser**	1173	A universal integration algorithm for rate-dependent elastoplasticity
Li Qiusheng, Cao Hong and **Li Guiqing**	1185	Static and dynamic analysis of straight bars with variable cross-section
Han-Bing Liu, Su-Huan Chen, Jia-Shou Zhou and **Hong-Dao Jiang**	1193	Statistics of eigensolutions for systems with random shape parameters using BEM
		Technical Note
Shuguang Li	1199	On the vectorial nature of the rotational degrees of freedom in spatial beam elements
	i	List of Contents and Author Index for Volume 59, 1996
